

Valpo Aviators is an astounding club. Its goal is to create a space for its members to build and fly rc airplanes, as well as other aviation related endeavors. Members are given great freedom to design planes of their choosing, and bring part of their creations home with them. It is a part of the Dean's Advisory Board. It is one of Valpo's newest student organizations. Its members voted it as the best club affiliated with the college of engineering. Pete Johnson is the advisor of the club, a treasured asset to Valparaiso University with a deep understanding of fluid mechanics.
